

Priory Quay has excellent marina facilities comprising two berthing areas; an interior basin which is accessed through a pair of remotely controlled gates and an exterior basin which adjoins the confluence of the rivers Avon and Stour. Access to both areas is strictly restricted and neither is accessible to the public. There is a total of some forty berths, most of which are permanently assigned to Priory Quay residents by the Directors of the Priory Quay Management Company (PQMC). In addition to these, there is a limited number of berths which can be assigned by PQMC either for short term visitors or on longer term leases to approved applicants. The occupation and use of the moorings is strictly controlled by the Priory Quay Marina Regulations.
